

Some R tips

- To use the icon directory as working directory
 1. Right click on R icon and select «Properties»
 2. Empty the «Start in» field and click «OK»
- `getwd()` → show the current working directory
- `setwd()` → change the current working directory
(or use «File/Change dir...» in the RGui)
- To get help
 - > `help.start()` for R help in general
 - > `help(function)` for help on a specific function
 - > `?function` for help on a specific function (click index to show all functions)
 - > `apropos(text)` for a list of all (loaded) functions containing «text»
 - > `example(function)` to show an example of the use of «function»
